Need to log important evidence / property information? Need to track evidence movement from collection to receiving/ from lab & court until release or destruction? Know who, what and where all evidence and property is with a single click. Using ID Blue RFID reader and PDA provides fast, secure and tamperproof collection, storage, movement, release or destruction documentation.

iVerified does the work for you...with RFID tags and bags!

- Use existing computer hardware - Installs on Windows 95, 98, NT - Notebook, Desktop, Server and PDA
- A User Friendly Application - Simple to add, log & search for records, a single click and all evidence/property is accounted, cataloged and secured. Completely tamperproof
- Allows user defined fields - use for additional data fields based on your needs or warehousing configuration
- Customize Labels & Reports to meet your needs
- Use RFID tags to easily find status of warehoused evidence & property
- Chain of custody with secure RFID tag and movement logs including field collection to secure and transport evidence with audit trail
- Easy to use scan process for fast logging during movement
- Track related subject information (Owner, Suspects, Etc.) - Time based reporting for pickup notification
- User Security Access To the Software
- Network Ready - Run on a single machine or on a network
